DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-10 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 is indefinite in regards to the limitation of: "and Y and Z are independently one of any suitable atom and functional group." What is the metes and bounds of a "suitable atom and a function group"?

Dependent claim 5 is indefinite in regards to the limitation: "wherein n is 1 one of 1 and 2."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1714

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-6, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Humphrey et al. U.S. Patent Number 2,778,801.

Humphrey et al teaches the stabilization of formaldehyde-hydrogen sulfide reaction products with 1-acetyl-2-thiohydantoin. Humphrey et al. further teaches the use of said stabilized composition in the inhibition of metal corrosion of metal equipment by aqueous well fluids, see examples 3-4 and claims 1-12.

Art Unit: 1714

6. Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Reeve EP 0 443 821 A1.

Reeve teaches the use of 2-thiohydantoin as a stabilizer for 3-isothiozolones which are used as biocides in metal working fluids. Applicant's claims are directly anticipated over the disclosure asset forth in Example 1. Also see page 2, lines 47-57.

7. Claims 1-7 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by the Article entitled: "INFLUENCE OF THE HEAT EXCHANGE OF THE INHIBITING EFFICIENCY OF SOME HETROCYCLIC DERIVATIVES ANAINST COPPER CORROSION IN 3.5% NaCl SOLUTIONS".

Applicant's claims are directly anticipated when 2-thioidantoine (2Thio) is used as the corrosion inhibitor in the aqueous solutions as set forth in the article.

8. Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant cited Derwent Abstract of WO9622353A1.

The said Derwent abstract clearly discloses cleaning products which contain anti-corrosion agents for silver. Applicant's claims are deemed to be anticipated when thiohydantoins are used as the anti-corrosion additive and said cleaning product is added to an aqueous wash medium.

Prior-Art Cited But Not Applied

Art Unit: 1714

9. Any prior-art reference which is cited on FORM PTO-892 but not applied, is cited only to show the general state of the prior-art at the time of applicant's invention.
